

Education Resources

The Utah Council of Land Surveyors has recommitted ourselves to **Education and Outreach** in the State. Below are some resources we have available to support you in the classroom:

Key Focus Areas

- | Elementary School - Introduce maps and surveying |
- | Jr. High - Support Math Programs and School Clubs |
- | High School - CTE, Internships, Career Fairs |
- | Beyond - Internships, STEM and Career Fairs, Scholarships |

For more information visit www.UCLS.org

Elementary Schools

The Utah Council of Land Surveyors has adopted the world wide program: Get Kids into Survey

Visit <https://www.getkidsintosurvey.com/> for free resources

Jr. High / Middle Schools

Surveying is a math focused career. As Jr. High aged youth focus on a career direction and higher level learning the Utah Council of Land Surveyors can demonstrate real world application of principles.

- Youth and Scout Groups
- Drone Demonstrations
- Survey Equipment and Uses
- Promote the Future City Competition
- Construction/Engineering Principles

High School

The possibilities are endless for High Schoolers. Companies across the state are bringing on interns during the school year. Experience is often not required, drafting experience is a plus. This introduces them to survey and engineering. Summer jobs are also available, working outside on a survey crew.

The Utah Council of Land Surveyors is already teamed up with many school districts to support STEM and CTE education. For example our Golden Spike Chapter is working with the Davis School District - Catalyst Center Drone students to design a mini city based on their drone flight.

The UCLS also offers scholarship opportunities through the Trigstar program.
